Business Internet Banking

Authorisation control in Business Internet Banking

If your business application is successful, an individual will be granted access to our online banking platform, Business Internet Banking. This individual will be designated as the primary user and will have the authority to create additional (secondary) users. For the management of payments and user access, your business may opt for either sole control or dual control authorisations.

What is sole control?

Under sole control, the primary user, or any secondary user with the appropriate permissions, can make payments and set up and edit user profiles on their own.

What is dual control?

With dual control, a minimum of two users is required to authorise all payments and to approve the set up and editing of user profiles. Many businesses prefer dual control for enhanced security measures. Should your business choose dual control, single users will not have the capability to make payments or set up and edit user profiles on their own. If a switch to sole control is necessary at a later date, it may take up to five business days and could require approval in accordance with the signing instructions outlined in the mandates. This may affect payments processed during that timeframe.
